

## Dental PBRN Study 12: Questionable Occlusal Carious Lesions

Use this Data Collection Form when a questionable occlusal carious lesion is enrolled. Please remember that the term "questionable" is defined as a tooth with no cavitation (no continuity break in the enamel) and no radiographic radiolucencies, but the presence of caries is suspected due to roughness, surface opacities, or staining. This study concerns both non-operatively treated lesions as well as operatively treated lesions.

You may record information on 1 or 2 questionable occlusal carious lesions on the same patient at one visit. You may do so by filling in the details on this information sheet and then filling out a data sheet for each lesion.

For each question, please indicate the answer that best applies by marking an "X" in the corresponding box like this: X It is very important that the responses be recorded within the space allotted.

When recording numerical responses, such as amounts or dates, one number should be entered in each box and every box should have a number in it. Therefore, it may be necessary to record leading zeros when the number requires fewer boxes than provided.

g 🛄 Other (please specify) \_\_\_\_\_

5. Does the patient have any dental insurance or third party coverage?

a 🗌 No b 🗌 Yes

6. On which tooth is the questionable area located?	For questions 13 –18 How would you characterize the patient's dental history in the following areas? (check one answer per question)
	13. Caries
7. Which are best describes the luster of the supptionable grap?	a No caries lesions treated in the past 2 years
7. Which <b>one</b> best describes the luster of the questionable area?	b 1-2 caries lesions treated in the past 2 years
a Chalky appearance	c 3 or more lesions treated in the past 2 years
b 🔲 Shiny appearance	14. Recall
8. Which <b>one</b> best describes the color of the questionable area?	a Regular recall care intervals b Irregular recall care interval
	15. Homecare
a 🖂 Opaque b 🗌 White spot	a Good oral self-care
c Ville Spot	b Fair oral self-care
d Dark brown/black discoloration	c Poor oral self-care
e Other	16. Restorations
	a Has restorations
9. Is the questionable area associated with a fissure or pit?	b Does not have restorations
	17. Fluoride
a 🔄 No	a Optimal FI level (inc FI toothpaste) or receives FI treatments
b Yes – limited to the pit or fissure	b Suboptimal FI level and does not receive FI treatment 18. <b>Miscellaneous</b> (Check all that apply)
c 🖂 Yes – extending beyond the pit or fissure	a Cariogenic Diet
40 Millich side ware used in medium (ast see finning) the	b Medication/Disease induced xerostomia/hyposalivation
10. Which aids were used in <b>making (not confirming)</b> the diagnosis? (Check all that apply)	c Active Orthodontic treatment
a Magnification (please indicate power)	19. I chose to treat the tooth today by: (Please check all that apply)
b 🔄 Air drying	a Monitoring
c Dental explorer	b Oral hygiene instruction
d Laser fluorescence such as DIAGNOdent®	c Applying/prescribing fluoride
(measurement)	d Applying varnish
e 🔄 Caries Detecting Dye	e Sealant placement (etch tooth with <b>no</b> preparation, with
f Radiographs	sealant material/composite resin placed over it )
g 🛄 Transillumination	f Enameloplasty (removing superficial grooves and other
h 🛄 Other	defects with or without fluoride/resin material)
If you did not use an explorer, please skip to question 13	g Preventive Resin Restoration (i.e. minimal tooth preparation, composite resin placed, with sealant material placed over it)
11 Milan you used a dantal syntaxon did you synamics	h – Full Restoration
11. When you used a dental explorer, did you experience roughness of the enamel surface upon light exploration?	Other
a 🗌 No	If you chose a,b,c, d, or e please <b>STOP</b>
b 🗌 Yes	20. If you chose to restore this tooth, what did you find?
	a No caries
12. When you used a dental explorer, did you experience retention of the explorer in a groove or fissure?	b Inactive/ re-mineralized caries
	c Active caries (Outer 1/2 of Enamel)
	d Active caries (Inner ½ of Enamel)
b Yes-Slight stick	e
c 🔄 Yes-Resistance to removal	f
	g Active caries (Inner 1/3 of Dentin)
	21. If you chose to restore this tooth, what type of material did you
	c Glass ionomer
	d 🛄 Other

22. On which tooth is the questionable area located?	For questions 29 –34 How would you characterize the patient's dental history in the following areas? (check one answer per question) 29. <b>Caries</b>
	a 🗌 No caries lesions treated in the past 2 years
23. Which <b>one</b> best describes the luster of the questionable	b 1-2 caries lesions treated in the past 2 years
area?	$c \square 3$ or more lesions treated in the past 2 years
a 🔄 Chalky appearance	30. Recall
b 🛄 Shiny appearance	a 🔲 Regular recall care intervals
	b Irregular recall care interval
24. Which <b>one</b> best describes the color of the questionable	31. Homecare
area?	a 🗌 Good oral self-care
a 🔄 Opaque	b 🗌 Fair oral self-care
b 🔄 White spot	c 🗌 Poor oral self-care
c Yellow/light brown discoloration	32. Restorations
d  Dark brown/black discoloration	a Has restorations
e 🗌 Other	b Does not have restorations
	33. Fluoride
25. Is the questionable area associated with a fissure or pit?	a Optimal FI level (inc FI toothpaste) or receives FI treatments
	b Suboptimal FI level and does not receive FI treatment
a 🔄 No	34. Miscellaneous (Check all that apply)
b 🔄 Yes – limited to the pit or fissure	a 🔄 Cariogenic Diet
c 🗌 Yes – extending beyond the pit or fissure	b Medication/Disease induced xerostomia/hyposalivation
	c Active Orthodontic treatment
26. Which aids were used in <b>making (not confirming)</b> the diagnosis? (Check all that apply)	35. I chose to treat the tooth today by: (Please check all that apply)
a Magnification (please indicate power)	a 🔄 Monitoring
b Air drying	b 🔄 Oral hygiene instruction
c 🗌 Dental explorer	c Applying/prescribing fluoride
d Laser fluorescence such as DIAGNOdent®	d 🛄 Applying varnish
(measurement)	e Sealant placement (etch tooth with <b>no</b> preparation, with
e 🗌 Caries Detecting Dye	sealant material/composite resin placed over it )
f Radiographs	f 🛄 Enameloplasty (removing superficial grooves and other
g Transillumination	defects with or without fluoride/resin material)
h 🗌 Other	g Preventive Resin Restoration (i.e. minimal tooth preparation,
	composite resin placed, with sealant material placed over it)
If you did not use an explorer, please skip to question 29	h - Full Restoration
	i 🛄 Other
27. When you used a dental explorer, did you experience roughness of the enamel surface upon light exploration?	If you chose a,b,c, d, or e please <b>STOP</b>
a 🗌 No	36. If you chose to restore this tooth, what did you find?
b 🗌 Yes	a 🔄 No caries
	b 🔄 Inactive/ re-mineralized caries
28. When you used a dental explorer, did you experience	c 🔄 Active caries (Outer ½ of Enamel)
retention of the explorer in a groove or fissure?	d Active caries (Inner ½ of Enamel)
a 🗌 No	e Active caries (Outer 1/3 of Dentin)
b 🗌 Yes-Slight stick	fActive caries (Middle ¼ of Dentin)
c Ves-Resistance to removal	g └── Active caries (Inner ⅓ of Dentin)
	37. If you chose to restore this tooth, what type of material did you use?
	a 🔄 Amalgam
	b Composite
	c 🔄 Glass ionomer
	d Other
